

# 9ThirtyOne — Save to Home Screen / Install Guide

Sep 22, 2026 · @Dave

Step-by-step instructions for installing 9ThirtyOne as an app on Android, iOS, macOS, and Windows. Once installed, it opens in its own window with the 931 icon — no address bar, just like a native app.

## Android (Chrome)

1. Open **Chrome** and go to the 9ThirtyOne site.
2. Look for an "**Add 9ThirtyOne to Home screen**" banner near the address bar. If it appears, tap it and skip to step 5.
3. If no banner appears, tap the **three-dot menu** (⋮) in the top-right corner.
4. Select "**Add to Home screen**" or "**Install app**" (wording varies by Chrome version).
5. Confirm the name if prompted, then tap **Add** or **Install**.
6. The 931 icon appears on the home screen and opens in its own window, without the browser address bar.

## iOS (Safari or Chrome)

1. Open **Safari** or **Chrome** and go to the 9ThirtyOne site.
2. Tap the **Share** icon (square with an upward arrow) — in Safari it's in the bottom toolbar; in Chrome it's usually near the address bar or top-right menu.
3. Scroll the share sheet and tap "**Add to Home Screen.**"
4. Confirm or edit the name, then tap **Add** in the top-right corner.
5. The 931 icon appears on the home screen and opens full-screen, like a native app.

## macOS

Two options, depending on browser. Chrome/Edge gives a cleaner, chrome-free window; Safari's version keeps a small toolbar (an Apple limitation, not something 9ThirtyOne can change).

### Safari ("Add to Dock," macOS Sonoma or later)

1. Open **Safari** and go to the 9ThirtyOne site.
2. Click **File** → **Add to Dock** (or the Share icon → Add to Dock).
3. Confirm the name and click **Add**.
4. The 931 icon appears in the Dock and launches in its own window — with a persistent back/forward/share toolbar.

### Chrome or Edge (chrome-free window)

1. Open **Chrome** or **Edge** and go to the 9ThirtyOne site.

2. Click the **Install icon** in the address bar (a monitor with a down arrow, or a  $\oplus$  symbol). If it's not visible, open the : **menu** → **Cast, Save, and Share** → **Install 9ThirtyOne**.
3. Click **Install** in the prompt.
4. The app opens in its own window and is added to the Applications folder / Launchpad.

## Windows (Chrome or Edge)

1. Open **Chrome** or **Edge** and go to the 9ThirtyOne site.
2. Click the **Install icon** in the address bar (a monitor with a down arrow, or a  $\oplus$  symbol).
3. If it's not visible, open the : **menu** → **Apps** → **Install 9ThirtyOne** (Chrome) or ... → **Apps** → **Install this site as an app** (Edge).
4. Click **Install** in the prompt.
5. The app is added to the Start menu and opens in its own window, pinnable to the taskbar.
